### Course Syllabus

#### Introduction

This unique 10-day programme has been designed to enable delegates to learn more about the latest international development and best practice in implementing and operating a structured management systems approach to manage key operating areas of businesses. They will also learn the requirements of ISO31000 enabling them to bring the benefits of effective risk management into all aspects of their organisations including planning, operations and communication.

- The principles of risk management
- A framework for the management of risk
- Risk assessment
- Links to other management systems

## **objectives**

- Identify the common components of management systems standards
- State the benefits of an effective integrated management system
- Understand the business benefits of the integrated approach
- Develop a framework for integration in their own organisation
- Future proof their own systems in readiness for changes to ISO standards
- Gain an understanding of what is required for managing enterprise risks
- Application of the formal structure provided in ISO31000 to their organisation
- An understanding of different techniques for risk assessment
- Audit skills and techniques to determine effectiveness of risk management
- Opportunities for improvement in the management of risk throughout the organisation
