Syllabus

Course Syllabus

Introduction

This course leads delegates through the development and implementation of carefully crafted strategies for the acquisition of all goods, parts, equipment, and services. This is a critical issue for all organizations wishing to reduce operating cost while improving quality and productivity.

This program explores key concepts of Strategic Cost/Price Analysis, Value Analysis, and Total Cost of Ownership that will move today's supply management organization to the strategic focus needed to achieve world-class performance. Organisations sticking to out-dated procedural and tactical approaches will be outcompeted by leading organisations utilising the latest approaches and techniques to ensure that their supplier base matches their ambitions.

This course will feature:

- Understanding and managing supplier pricing models

Objectives

- Analyse the elements of cost in supplier's price
- Understand differences in international labor rates
- Evaluate supplier's different pricing models & analyse supplier's price breakdowns
- Understand methods of price and cost analysis
- Create an approach to implementing TCO analysis
