Course Syllabus

Introduction

This practical and highly engaging course will prepare all participants to design, develop, manage, control, implement, simplify and monitor work processes and procedures and associated management system documents such as work instructions, forms, labels and tags. The course will especially focus on producing and simplifying procedures.

This course will feature:

- Complete definitions and use of all relevant documents
- A complete approach to Management System documentation structures
- The compelling need for simplicity and clarity and how to achieve it

By the end of this course, participants will be able to:

- Describe the purpose, advantages & structure of a documented Management System
- Demonstrate how management documentation is developed
- Identify who needs to be involved in the process of developing such documentation
- Write clearly and simply each type of document emphasizing on procedures
- Explain how to analyse process flow charts with the aim of simplifying the procedure
