### Advanced Health and Safety Management Course by Skilllinkx

#### Course Overview

In today's dynamic workplace environments, ensuring health and safety is paramount. Skilllinkx's Advanced Health and Safety Management Course equips professionals with cutting-edge techniques and knowledge to effectively manage and enhance workplace safety. This specialized training focuses on both technical and behavioral aspects of safety, ensuring a holistic approach to risk management.

#### Course Objectives

- Understand and apply international safety legislation and standards.
- Develop and implement comprehensive Safety Management Systems (SMS).
- Enhance safety culture through behavioral safety techniques.
- Conduct effective risk assessments and HAZOP studies.
- Utilize work permit systems and lockout/tagout (LO/TO) procedures.

## **Day 1: Legislation and Regulatory Framework**

- **Introduction to Health and Safety Management**

- Overview of safety management evolution and importance.
- Key concepts and principles.

- **International Health and Safety Legislation**

- OSHA standards (OSHA 29 CFR 1910.119)
- EU Seveso Directive
- Other global regulatory requirements.

- **High Hazard Industries**

- Specific regulatory requirements and best practices.

## **Day 2: Safety Management Systems and Safety Culture**

- **Introduction to Safety Management Systems (SMS)**

- Components and structure of an effective SMS.

- **External and Internal System Environments**

- Influences on safety management.

- **Policy and Safety Culture**

- Developing and implementing health and safety policies.
- Organizational and human factors in safety.
- Promoting a positive safety culture.

## **Day 3: Risk Management and Implementation**

- **Risk Control and Management**

- Risk control systems: inputs, processes, and outputs.
- Comprehensive risk assessments.

- **Work Permit Systems and LO/TO**

- Procedures and best practices.

- **Hazard Communication and COSH**

- Effective hazard communication strategies.
- Conducting COSHH assessments.

## **Day 4: Performance Measurement and HAZOP**

- **Performance Measurement**

- Active and reactive monitoring systems.
- Conducting audits and reviews.
- Case study: The Flixborough Disaster.

## **Day 5: Behavioral Safety and Course Evaluation**

- **Behavioral Safety**

- Theories and models (Taylor, Herzberg, Vroom, Geller, Maslow).
- ABC analysis: Antecedents, Behavior, and Consequences.
- Identifying and observing critical behaviors.
- Providing feedback and implementing improvements.
- Case study: BP Texas City.

- **Course Evaluation and Summary**

- Comprehensive review and evaluation.
- Participant feedback and discussion.
